

Reliable online backup services for enterprise

BackMeUp is a fully automated online backup service that protects valuable company data from disaster, failure and malicious attack.

We achieve this by backing up your data to a remote online server that is both safe and secure.

Why BackMeUp?

- Unbeaten service and support for an online backup company.
- Great value for money.
- Fully insured service up to €2 Million worth of data loss per customer, for your peace of mind.
- Backup plans to suit any amount of data and size of pocket.
- Registered with the data commissioners of Ireland.
- Instant access to your data, complete with 4 hour get data back commitment, even for large backups.
- Client side encryption. We cannot see your data.
- Supported by Microsoft Small Business Specialist, IT industry veterans.
- 20 years collective experience in delivering backup solutions (online and otherwise) to varied business throughout Ireland.

BackMeUp was created by a leading Dublin based, SME business IT management company, [SupportsIT](#)

. We have spent the last 7 years managing the IT infrastructures of a large variety of customers. As a primary part of this, our IT company has spent a large amount of time setting up backup processes, developing business continuity plans and providing great support when things have gone wrong or disasters have naturally occurred. Now that online backup has evolved into a reliable and good value service, we have created BackMeUp as a separate company to provide online backup services.
